

Approved For Release 2005/08/22 : CIA-RDP87-01130R000100090014-6

*Approved response  
from LSD.  
Sept 1981*

1. Curbing - GSA will repair.
2. Bare spots and general reseeding has been accomplished.
3. FAC provide recommended layout and colors for azaleas to LSD. Will arrange for planting this fall - now!
4. FAC provide specifics to LSD on where azaleas could be used elsewhere on the compound.
5. Impatiens will be provided for outside the entranceway to the North Cafeteria.
6. Magnolias will be replaced in the center court in October/November 1981.
7. Dead trees along the main roadway will be removed and replaced in October/November 1981.

Approved For Release 2005/08/22 : CIA-RDP87-01130R000100090014-6

MEMORANDUM FOR: Chief, Logistic Services Division, OL

FROM: Bruce T. Johnson  
Chairman, Fine Arts Commission

SUBJECT: Landscaping Suggestions

1. The Fine Arts Commission at a recent meeting reviewed several suggestions concerning the grounds of the Headquarters Building. It seemed appropriate to pass these suggestions along to you. I quote from the memorandum we received:

"On the negative side, I have noticed that the curbstone (curbings) separating the various paved walkways from the grassy areas are in terrible condition. Most of them have either crumbled into oblivion, or are in the process of doing so. Is this strictly a GSA responsibility or does the FAC have any impetus in this matter? I feel that the curbings should either be repaired, or removed and the grass allowed to grow out to the edge of the paved walkways.

"I have noticed that there are many bare spots in the grassy areas. They are really an eyesore to an otherwise attractive Headquarters compound. A fall re-seeding would probably do wonders next spring.

"Although the compound is quite nice in comparison to many Federal facilities which have little or nothing in terms of space, nature, and lack of color on the grounds, except perhaps for the Fall. One suggestion I would like to offer is to plant azaleas along the crest of the hill behind the cafeterias. Although their blooming season is somewhat short, these shrubs are hardy, colorful in bloom, and native to the area. I think that a ridge of multi-colored azaleas bordering the wooded area would be a beautiful sight in the spring.

"The idea of azaleas lending color to the compound could be applied to several other areas, such as the main-entrance road and some of the wooded areas bordering the many walkways on the compound.

"The subject of the dying shrubs outside the North Cafeteria has surfaced in the past. Currently there is nothing near the entranceway, presumably because the roof overhand prevents adequate rainfall getting to the shrubs. Assuming that this problem could be overcome by manual watering by the grass-cutting contractor crew, would it not be nice to add some color by planting Impatiens? They grow well in shady areas and are quite colorful in multi-colored groupings. They may be quite suitable for use elsewhere on the compound."

*Handwritten: Hoke*  
2. Several people have mentioned to me the apparent loss of some of the magnolias in the central court. These trees have added a great deal to the appearance of the main concourse, so we will hope for their replacement with sizeable specimens (always recognizing the problem of getting large trees into the courtyard).

3. There is considerable interest on the part of the FAC in the landscaping of the Headquarters compound. Would it be possible for you to arrange a briefing for us on the planting and plant care program? Our next meeting is to be at 1100 hrs. on 5 October in room 7D32, Hq. Would that be a convenient time?

MEMORANDUM FOR: Chairman, Fine Arts Commission

FROM:

Member, Fine Arts Commission

SUBJECT: Landscaping Items of Possible Interest, and  
Wilderness Trail Status

1. There are several items of concern that I would like to bring to your attention as possibly meriting the attention of the Fine Arts Commission (FAC). They are mainly concerned with the environmental enrichment, or deterioration, of the Headquarters compound.

a. On the negative side, I have noticed that the curbstones (curbings) separating the various paved walkways from the grassy areas are in terrible condition. Most of them have either crumbled into oblivion, or are in the process of doing so. Is this strictly a GSA responsibility or does the FAC have any impetus in this matter? I feel that the curbings should either be repaired, or removed and the grass allowed to grow out to the edge of the paved walkways.

b. I have noticed that there are many bare spots in the grassy areas. They are really an eyesore to an otherwise attractive Headquarters compound. A fall re-seeding would probably do wonders next spring.

c. Although the compound is quite nice in comparison to many Federal facilities which have little or nothing in terms of space, nature, and landscaping, I have long felt that there is a lack of color on the grounds, except perhaps for the Fall. One suggestion I would like to offer is to plant azaleas along the crest of the hill behind the cafeterias. Although their blooming season is somewhat short, these shrubs are hardy, colorful in bloom, and native to the area. I think that a ridge of multi-colored azaleas bordering the wooded area would be a beautiful sight in the spring.

d. The idea of azaleas lending color to the compound could be applied to several other areas, such as the main-entrance road and some of the wooded areas bordering the many walkways on the compound.

SUBJECT: Landscaping Items of Possible Interest, and Wilderness Trail Status

e. The subject of the dying shrubs outside the North Cafeteria has surfaced in the past. Currently there is nothing near the entranceway, presumably because the roof overhang prevents adequate rainfall getting to the shrubs. Assuming that this problem could be overcome by manual watering by the grass-cutting contractor crew, would it not be nice to add some color by planting Impatiens? They grow well in shady areas and are quite colorful in multi-colored groupings. They may be quite suitable for use elsewhere on the compound.

2. On the subject of the Wilderness Trail, I made a walk-thru inspection on 13 July, just prior to our last FAC meeting. The trail is still incomplete. Several sections are either totally lacking in wood chips or overgrown with vegetation. There are also several muddy areas, particularly at the bottom of the trail where it turns. Perhaps I'll have better news by our August meeting.
